# Price List of Seeds

## for 1918

The seed crop in 1917 was the shortest ever known on many things, especially Seed Beans and Sweet Corn, many kinds being a total failure, and but few kinds of Bunch Beans run over 25% of a normal crop. Sweet corn was nearly all frozen in the field and so damaged that not over 25 to 30% is fit for seed. Many varieties a total loss, so far as seed purposes are concerned. Spinach is hard to get at any price, and Mango Peppers were almost a total failure.

Our prices are based on our present supply, which will not be more than 30 to 50% of a normal supply, and will be subject to change without notice, when we have to go into the market to replenish our stock.

**BUY YOUR SEEDS EARLY**, or we may not have what you want when you want it.

**J. W. ROSS.**

### BEANS, Dwarf or Bush

Green podded sorts

	Per lb.
Improved Red Speckled Valentine	55
Burpees Stringless Greenpod	60

### Wax or Yellow Podded Varieties

	Per lb.
Davis White Wax	55
Golden Wax, Crop failed.
